

AFFINITY CONSULTING GROUP EXPANDS LEGAL DOCUMENT MANAGEMENT CAPABILITIES WITH ADDITION OF PARTNER RON WARMAN

Largo, Florida – February 26, 2019 – Affinity Consulting Group, a law firm management and legal technology consulting company, announces the recent addition of Partner Ron Warman to the company's leadership team.

An industry insider with over 20 years of experience in legal document management systems (DMS), Warman is well respected for his ability to implement solutions that enable clients to both manage daily challenges and plan for future growth.

“Ron brings an extensive, high level of technical experience to our team, and has worked with some of the most prominent law firms in the world,” says Affinity Partner Debbie Foster. “He has a unique ability to connect with clients at any level, from CIOs and managing partners to help desk technicians, and everyone in between. Ron is an incredible resource to our clients. Affinity could not be happier to have him on our team.”

Warman will head Affinity's industry-leading DMS department, which comprises 20 specialized engineers and consultants. The team's work helps legal organizations to reduce their dependence on paper while improving efficiency and productivity. More information about Affinity's DMS capabilities is available at <https://www.affinityconsulting.com/document-email-management/>.

“I have been working with various DMS platforms for my entire career,” says Warman. “I started with some brief exposure to Soft Solutions and would later gain extensive experience with products such as Docs Open/DM/eDocs, iManage, NetDocuments and Worldox. Document management has been my primary area of concentration for the last 10 years, with a more recent strategic focus on NetDocuments, a leading cloud-based DMS.”

Warman's decision to join Affinity was based largely on the depth of DMS talent already in place, he says, and the complementary strengths of existing team members. A shared vision of the roles played by people, process, and technology in the success of legal organizations was also a factor. Warman's addition to Affinity's DMS team has enabled the company to extend an existing growth pattern and expand into large corporations, where the need for document management solutions is continually evolving and demand for in-depth technical expertise is high.
